Re: Rocky Flats Legacy Management Agreement	
Rocky Flats Legacy Management Agreement to the Rocky Flats Legacy Management Agreement Parties, On behalf of the Board of Directors of the Rocky Flats Stewardship Council, is pleased to offer comments on the draft Rocky Flats Legacy Management Agreement (RFLMA). Post Closure Management of Rocky Flats remains vitally important and the Stewardship Council is grateful for the US Department of Energy (DOE), US Environmental Protection Agency (EPA), and Colorado Department of Public Health and Environment (CDPHE) commitment to issue.

PD-A-000006	1/25/2007
RE: RFLMA dated December 6, 2006	
The City and County of Broomfield is providing comments to the Rocky Flats Legacy Management Agreement. As a downstream community that has been involved with Rocky Flats since the early 1970's, Department of Public works will continue to be intimately involved with post-closure activities. The Department of Public works thanks the US Department of Energy (DOE), the US Environmental Protection Agency (EPA), and the Colorado Department of Public Health and Environment (CDPHE) for the open door policy with the community and other governments downstream of Rocky Flats.

PD-A-000007	1/26/2007
RE: Draft Rocky Flats Legacy Management Agreement	
The City of Northglenn is pleased to have the opportunity to provide comments on the Rocky Flats Legacy Management Agreement (RFLMA). The City of Northglenn comments fall into three general categories: Communication, Monitoring, and Administrative Record. As one of several interested downstream communities, the City of Northglenn (Northglenn) has appreciated and believe that the citizen's have benefited from the open and transparent communication.

Second Five-Years Review Report for RFS Jefferson and Boulder Counties, Colorado

The Second Five-Year Review Report for Rocky Flats Site Jefferson and Boulder Counties, of Colorado. The U.S. Department of Energy's (DOE's) Office of Legacy Management (LM) has conducted a second five-year review of remedial actions implemented at the Rocky Flats Site (RF). Because remaining contamination in portions of Rocky Flats do not allow for unlimited use and unrestricted exposure, periodic reviews are required by law to be conducted at least every five years to determine whether remedial actions remain protective of human health and the environment.

RE: RFLMA Contact Record 2008-01	
The Colorado Department of Public Health and Environmental (CDPHE) has reviewed RFLMA Contact Record 2008-01, which reports the surface water and sediment sampling done in support of the requirements in the Rocky Flats Legacy Management (RFLMA). The Contact Record concludes that no further sampling is necessary to meet the RFLMA requirements. CDPHE has conferred with Region 8 on the Environmental Protection Agency and approves this contact Record.

Notification of Well Replacement and Well Identification Change	

Notification of Well Replacement and Well Identification Change. Sentinel well 45605 was installed on the north-facing hillside south of former Building 991. Subsequent movement of the slump on the hillside damaged the well. In late 2007, the well was sampled to meet fourth-quarter sampling requirements, and was then abandoned to make way for regarding efforts at the slump. DOE and SM Stoller staff discussed the approach with Carl Spreng, CDPHE during a meeting on May 6, 2008 and he approved this approach.

RE: RFLMA Contact Record 2008-05	
The Colorado Department of Public Health and Environmental (CDPHE) has reviewed RFLMA Contact Record 2008-05, which documents consultation regarding instances of concentrations of certain analytes that are greater in RCRA wells downgradient of the OLF than in the upgradient RCRA well. The supplemental analyses and comparisons provided are sufficient to satisfy the consultation requirements of Figure 10 in RFLMA Attachment 2. Monitoring the OLF RCRA wells will therefore continue and additional consultation regarding these specific circumstances will be required only if future trending analyses indicate trend. CDPHE approves this contact record without modification.

Path Forward for Original Landfill (OLF) Seep 7 Drain Extension, RFLMA

Conditions that warranted repair and the triggered further investigation in accordance with the OLF M&M Plan were found at the OLF during the 2007 inspections. Inspection details are included in the Rocky Flats Legacy Management Agreement (RFLMA) quarterly and annual reports for 2007. These conditions involved localized slumping and setting of the OLF cover, seep observed to daylight intermittently on the cover, and development of a continuous seep at the eastern toe of the buttress (identifies as Seep 8).

Second Five-Year Review Report for the RFS Jefferson and Boulder Countries, Colorado

The Second Five-Year Review Report for Rocky Flats Site Jefferson and Boulder Counties, of Colorado. The U.S. Department of Energy's (DOE's) Office of Legacy Management (LM) has conducted a second five-year review of remedial actions implemented at the Rocky Flats Site (RF). Because remaining contamination in portions of Rocky Flats do not allow for unlimited used and unrestricted exposure, periodic reviews are required by law to be conducted at least every five years to determine whether remedial actions remain protective of human health and the environment.

CAD/ROD for Rocky Flats Site Operations Guide Attachment-Book 1 of 4

CAD/ROD for Rocky Flats Site Operations Guide Attachment--Book 1 of 4. Corrective Action Decision/Record Decision for Rocky Flats (USDOE) Peripheral Operable Unit and Central Operable Unit Jefferson and Boulder Counties, Colorado. This document presents the selected corrective actions/remedial actions for the Peripheral OU and the Central OU at Rocky Flats. These actions were chosen in accordance with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended by the Superfund Amendment and Reauthorization Act of 1986.

Operations and Maintenance Plan for RF Surface Water Control Project Book 2 of 4

The Rocky Flats Site (RF) is under the jurisdiction of the U.S. Department of Energy (DOE) Office of Legacy Management (LM). Long-term surveillance and maintenance activities at Rocky Flats are conducted under the Legacy Management Support contract by S.M.Stoller Corp. Operation and management of the site surface water dams are performed as part of the surveillance and maintenance activities implemented at Rocky Flats, which include activities conducted pursuant to the Rocky Flats Legacy Management Agreement (RFLMA)(DOE 2007).

Final Landfill Monitoring and Maintenance Plan RFETS Original Landfill Book 3 of 4

This Monitoring and Maintenance Plan (Plan) has been prepared for the Original Landfill (OLF) (Individual Hazardous Substance Site 115 and 196)(IHSS) at the Rocky Flats Environmental Technology Site (RFETS). Under the Final Interim Measure/Interim Remedial Action (IM/IRA) for the Original Landfill (U.S Department of Energy [DOE] 2005a), a 2-foot-thick soil cover was selected to address closure of the Original Landfill.

Revision of Sampling locations to reflect Site Reconfiguration	
Two monitoring locations identified in the RFLMA warrant revision. 1. Sentinal well TH046992 is located in the Center of Dam B-3. This well will be abandoned as part of the upcoming dam breach project, following routine RFLMA-required sampling for the fourth calendar of 2008. It is proposed that well TH046992 be abandoned as required, but not replaced; and that RFLMA monitoring continue unchanged at nearby wells 95099 and 23296.

RE: RFLMA Contact Record 2008-09	
The Colorado Department of Public Health and Environmental (CDPHE) has reviewed Contact Record 2008-09, which propose modifications to two monitoring locations. These proposals comply with the Rocky Flats Legacy Management Agreement and are consistent with previous consultations with CDPHE and this contact record is therefore approved. As stated in the contact record, corresponding changes will be made to Attachment 2 of RFLMA the next time the document is modified.

RE: Screening Level Evaluation for RF Solar Ponds Plume Treatment System Upgrades

The Colorado Department of Public Health and Environment (CDPHE) has reviewed the above referenced Screening Level Evaluation. The evaluation was performed in response to concerns about treatment system additives proposed in RFLMA Contact Record 2009-01 and their potential effects on surface water quality. The information provided in the evaluation sufficiently addresses those concerns and the evaluation is approved as an addendum to Contact Record 2009-01.

U.S. DOE posted two presentations and a Contact Record to Rocky Flats LM	

The Overview of the 3rd Quarter 2009 Surveillance and Maintenance Report is located at <http://www.lm.doe.gov/Rocky_Flats/Documents.aspx> on the Site Documents Page.

An Introduction on the Rocky Flats Surface Water Configuration Environmental Assessment (EA) is located on the Community Involvement page at <http://www.lm.doe.gov/Rocky_Flats/Sites.aspx?view=5>. This presentation outlines the process for evaluating the impacts related to breaching dams and restoring the approximate stream configurations for creek traversing the Rocky Flats Site. The public is invited to view and discuss presentations on Monday 1, 2010 at 9 a.m. at the Rocky Flats Stewardship Council quarterly meeting, located at the Rocky Mountain Metropolitan Airport Terminal Building, 11755 Airport Way, Broomfield, Colorado.

Contact Record RFLMA cr 2010-01, which addresses targeted soil sampling at the Original Landfill (OLF) to evaluate contaminations levels in relation to the Colorado Department of Public Health and Environment's (CDPHE) August 2008 Policy, End of Post-Closure Care, is located at <http://www.lm.doe.gov/Rocky_Flats/ContactRecords.aspx>, or by clicking on Contact Records on the Community Involvement page.

RE: RFLMA Contact Record 2010-01	
The Colorado Department of Public Health and Environment (CDPHE) has reviewed RFLMA Contact Record 2010-01, which proposed additional sampling at the Original Landfill in anticipation of eventual reductions in monitoring and maintenance schedules. Aspects of this sampling will be proposed for approval in a subsequent sampling and analysis plan. All the elements required by the Rocky Flats Legacy Management Agreement for a project of this type are adequately addressed and the contact record is therefore approved.

RE: Original Landfill Monitoring and Maintenance Plan modification request	
The Colorado Department of Public Health and Environment (CDPHE) has reviewed modifications made to the Original Landfill Monitoring and Maintenance Plan, dated September 2009. All the proposed changes are consistent with consultations between CDPHE and the Department of Energy and the current conditions at the Landfill. Region 8 of the U.S. Environmental Protection Agency has also reviewed these modifications and concurs with this conclusion. The modifications are therefore approved.

Delivery of 2009 Wetland Mitigation Monitoring Report for the Rocky Flats Site	
During cleanup and closure activities at the Rocky Flats Site (Site), several wetland areas were disturbed. The Site Wetland Mitigation Monitoring and Management Plan (WMMMP: June 2006) was written to address the mitigation and monitoring of these effects on the wetland. One of the requirements of the WMMMP is to produce an annual report that summarizes the monitoring data and management actions and issues from the previous field season. Because of the large number of monitoring photographs that the report includes, it is in a completely electronic format. The report is set up on a website on the enclosed DVD. To access the report, put the DVD in a DVD drive, and open Windows Explorer. Double-click on the file the report, called "START HERE 2009 Wetland Mitigation Report DVD.htm".

RE: RFLMA Contact Record 2010-02	
The Colorado Department of Health and Environment has reviewed the draft Contact Record 2010-02. This contact record allows excavations that would breach all the remaining dams in the Central Operable Unit. This action is acceptable for the same reasons that earlier breaching action were acceptable; i.e., their presence is not a requirement of the remedy and removal of the ponds provides several advantages that further the environmental restoration at the site. This propose action is in accordance with our regulatory requirements and guidance and this contact record is therefore approved.

RE: RFLMA-Proposed Removal to Terminal Ponds and New Surface Water Monitoring and Compliance Points

As the Department of Energy (DOE)-designated Local Stakeholder Organization for Rocky Flats, the Rocky Flats Stewardship Council is expressing its support of the downstream communities to advocate for retaining the terminal ponds A-4, B-5 and C-2. In addition, if any proposed changes include the removal of the terminal ponds and/or the establishment of new surface water monitoring and compliance points with consideration of groundwater in alluvium, the parties should consider such action as a significant change from existing requirements of the Rocky Flats Legacy Management Agreement (RFLMA).

Offsite Well Abandonment at the Former Rocky Flats Plant

This correspondence is in reference to the three existing monitoring wells that were installed in the 1990s off of the former Rocky Flats Plant property. The wells are located immediately west and east of Great Western Reservoir as illustrated in the attached map. They are not useful to the Rocky Flats Site and is scheduled to be abandonment in accordance with regulations set forth by the State of Colorado. The abandonment of said well will commence unless written objection from the City of Broomfield is received by the Department of Energy Office of Legacy Management within 30 days of the date of this letter.

RE: Abandonment of Groundwater Monitoring Wells-Great Western Reservoir Open Space

The City and County of Broomfield (Broomfield) has reviewed your correspondence dated May 13, 2010 regarding the proposed abandonment of three groundwater monitoring wells within Broomfield's Great Western Reservoir Open Space area. Broomfield as the property owner where the existing wells are located, objects to the abandonment of the well due to the limited amount of information provided with your correspondence. However, Broomfield will allow the abandonment to proceed subject to the Department of Energy Office of Legacy Management obtaining a Public/Private Improvement Permit.

Draft CR 2010-06 SW027 - Rev 1 tech edits Rev 1 DRAFT RFLMACR 2010-06 Monitoring Results at SW027.doc.

I sent out a Draft CR last Friday before getting the tech editor's comment back. She picked up a few mistakes (e.g., you probably noted in paragraph at top of page 3, word "continuation" instead of "contamination"), so I've fixed those and also adopted some of her suggested edits for clarity in this revised Draft. Based on the feedback on the Draft Contact Record 2010-04 for the proposed monitoring point changes, I also edited this Draft CR to replace references to "compliance values" with "12 month rolling average".

Rocky Flats - Broomfield letter of August 5, 2010	
Thank you for your letter of August 5, 2010, to the Secretary of Energy. As part of our ongoing public outreach program, the U.S. Department of Energy (DOE) Office of Legacy Management (LM) welcome input from neighboring cities and other interested parties regarding our stewardship of legacy management sites. As the Director of the Office of Site Operations within LM, I have authority for the Rocky Flats Site (RFS) and have been assigned to respond to your letter.

RE: Comment Period Extension for Proposed Modifications to Rocky Flats Management Agreement (RFLMA) dated July 20, 2010	
Your letter of September 20, 2010 requests an additional 21-day extension of public comment period on the proposed modifications to the RFLMA. The comment period is hereby extended until October 19, 2010. The RFLMA parties (Environmental Protection Agency, U.S. Department of Energy, and Colorado Department of Public Health) have consulted and all concur with this extension.

RE: RFLMA Contact Record 2010-02	
The Colorado Department of Public Health and Environment approved RFLMA Contact Record 2010-02 on April 15, 2010. In the interim the surrounding communities have raised concerns, including the potential violation of Institutional Control #2, as documented in the CAD/ROD and the Environmental Covenant. In addition, the schedule for implementing action that would require this approval is years in the future. In light of these considerations, our approval of Contact Record 2010-02-is withdrawn.

PD-A-000312	11/2/2010
Monitoring Results and Water Treatment at the MSPTS	
Treatment of contaminated groundwater by the MSPTS and ETPTS results in removal of the vast majority of contaminantion load from influent groundwater. Treatment does not result in complete removal of all groundwater contaminants, however, and low concentrations of few volatile organic compounds (VOCs)remain in system effluent at levels that are above RFLMA Attachment 2, Table 1 standards.

RE: RFLMA Contact Record 2011-03

The Colorado Department of Public Health and Environment (Department)has reviewd RFLMA Contact Record 2011-03, which documents consultation between the Department and the U.S. Department of Energy regarding evaluation of uranium and boron in groundwater at the Original Landfill and the Present Landfill. As stated in this contact record, evaluation of these anayltes will subsequently be documented in RFLMA Annual Reports rather than in contact records, unless future consultation becomes necessary.

PD-A-000348	4/25/2011
--------------------	-----------

Purpose: Resource Conservation and Recovery Act (RCRA) Well Monitoring Results at Orignal Landfill (OLF) and Present Landfill (PLF)

Groundwater monitoring results were reviewed in accordance with Rocky Flats Legacy Management Agreement (RFLMA) requirements and for the preparation of the 2010 RFLMA Annual Report. The results of statisitcal evaluations of analytical data from ther OLF and PLF RCRA wells required consultation among the RFLMA Parties. This contact record documents specific results driving the need for consultation. More detailed information will be provided in the 2010 Annual Report.

DOE LM Rocky Flats Site notification of a reportable condition at RFLMA Point of Evaluation GS10	
This notification is to inform you of a reportable condition under RFLMA Attachment 2, Section 6.0, Action Determinations, at the RFLMA Point of Evaluation, GS10. A reportable condition was determined of the most recently available validated analytical results for uranium from the composite sample collected during the period 4/11/11 1:50 - 5/4/11 11:39. The result for this sample was 71.0 ug/L total uranium. Validated results were received on 6/14/2011.

FW: AMP Group notification of a reportable condition at RFLMA Point of Evaluation GS10	
In AMP Group notification of a reportable condition at RFLMA Point of Evaluation GS10 we asked for your availability the first week of July in order to schedule and AMP Group meeting to discuss the reportable condition. So far I've received only three responses, with Thursday July 7, being the common availability. Please respond if that day works for you or if you would prefer to postpone until another week. If so, please suggest several available dates so that I can schedule a meeting.

RE: Release of Proposed Plan for Amendment of Corrective Action Decision/Record of Decision (CAD/ROD)	
On June 3, 2011, the Rocky Flats Legacy Management Agreement (RFLMA) Parties, which consists of the U.S. Department of Energy (DOE), the Colorado Department of Public Health and Environment (CDPHE), and the U.S. Environmental Protection Agency (EPA) released the Proposed Plan for amending the September 29, 2006, CAD/ROD for a 30-day public review and comment period. This has since been modified to a 60-day public review period. The City of Thornton (Thornton) concurs with the City and County of Broomfield's request that the public comment and review period be extended to 90 -days in order to have sufficient time to evaluate the changes to the CAD/ROD and related documents.

RE: Draft Contact Record 2011-04	
The AMP makes clear that the RFLMA process takes precedence. Now that we also have AMP group conversation piece, and difficulty in setting up mutually agreeable meeting time, ect., it is best not to wait for the AMP group input before informing public of what we are doing to address condition. We can factor in AMP group feedback when timely enough to inform the RFLAM consultative process.

Rocky Flats Community Advisory - Notice of Rocky Flats CERCLA Five - Year Review

The Department of Energy office of Legacy Management (DOE-LM) is conducting the third Five-Year of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) remedy for the Central Operable Unit (OU) at the Rocky Flats Site. The purpose of the review is to ensure the CERCLA remedy remains protective of human health and the environment. The remedy for the Central OU consists of environmental monitoring, physical controls and institutional controls. The Five-Year Review report is required to be completed Sept. 14, 2012.

Construction completion for new flume in Walnut Creek and Changes to RFLMA Point of Compliance (POCs)

This letter provides notification, pursuant to the referenced section of (RFLMA) Attachment 2, that construction of the new flume in Walnut Creek for sampling location WALPOC is complete. The associated sampling equipment for this flume is installed and has been tested for proper operation. Based on this notification, WALPOC now replaces POCs GS08 and GS11 as the RFLMA POC for the Walnut Creek drainage at the Central Operable Unit Boundary

Rocky Flats Site, Jefferson County, Colorado Proposed Plan for Amendment of the CAD/ROD

The Corrective Action Decision CAD/Record of Decision (ROD) for the Rocky Flats Site dated September 29, 2006 (DOE 2006a), was based on the Proposed Plan issued in June 2006 (DOE 2006b). This Proposed Plan provides information supporting an amendment of the CAD/ROD to clarify the IC wording to more accurately reflect the objective and rationale of the ICS, as stated in the CAD/ROD.
